The trailblazer for connections.

Meeting future energy storage needs in telecom applications with Marathon PowerCycle – irrespective of the grid.

The world is changing. That's why we are energizing a new world.

For Exide Technologies, now is the time to release new energies to move even further into the future. Our new claim "Energizing a new world" is designed to convey this aspiration. We want to bring change to life, face challenges together with our partners, and develop solutions for today and tomorrow. Let's create the future - the Exide Technologies way:

Innovation is the engine of technology leadership. That's why we are constantly evolving, remain self-critical, and continue to inspire our customers. We believe that great questions deserve great answers which is what our innovative R&D is responsible for

Sustainability is an important part of our responsibility. That's why we rely on renewable energy and intelligent recycling concepts.

High performance is the standard we set for our products and services. We want all our solutions to be best in class. This gives our customers the certainty of being optimally equipped for any task.

Reliability defines our business. This applies to our products as well as our innovative development work, services, and partnerships. We have a responsibility that doesn't stop with our products, but rather starts there.

Communication and energy are the keys to a better world. That's why we ensure a

stable network.

The world is evolving and with it the demands on energy supply. Our partners are also faced with the challenge of keeping operating costs as low as possible and the need for smart and sustainable energy solutions. Together, we can work to leave a future worth living for generations to come.

Marathon is now even better than before: Our well-known AGM battery series has always impressed with its reliability and robustness. With its high-purity lead and new advantages, the Marathon PowerCycle range extension is now also gaining importance in use cases with specia needs and challenges. The high temperature resistance and high cycling capability make it also a true all-rounder

Get the most out of Marathon PowerCycle.

Best performance and long life
Long service life and high cycling capability – even in uncontrolled areas and with unstable or unavailable power grids.

educed Total Cost of Ownership

The high temperature resistance enables outdoor installations and reduces energy costs for cooling in hot climates.

Front terminal design facilitates placement in a control

The future is full of challenges.

This makes reliable partners essential.

When our engineers develop products, they think of all eventualities. Marathon PowerCycle is made for today and tomorrow – e.g. supporting the implementation of 5G. With its strong new features, it is also meeting the growing market trend where batteries are evolving from simple back-up functionality into smart energy storage solutions combined with renewable energy sources or connected to distributed energy resonetworks (DER).

Technical features:

- Design life: 20 years at 20°C (until 80% nominal C10)
- · Extended life time at high-temperature operation: 10 years at 35°C, 7 years at 40°C

 1500 cycles at 60% depth of discharge (C10) at 20°C

 Wide operating temperature range: -40°C to +55°C

 Nominal capacity: 100 – 190 Ah

- · Maintenance-free (no topping up) during the whole service life

- High-compression AGM technology
 Central degassing
 Very low gassing due to internal gas recombination
- (99% efficiency)

 Grid plates with high-purity lead, low-calcium, high-tin alloy for excellent corrosion resistance

 Unique Carbon Boost[®]: for efficient charging
- MICROCAT® Catalyst: reduces float current and minimizes water loss
- Low self-discharge rate: extended storage capacity
 Flame retardant casing according to UL 94 V-0 available

- EUROBAT 2015 classification: >12 years very long life
- Designed in accordance with IEC 60896-21/22
 Approval: Underwriters Laboratories (UL)
 Trouble-free transportation without restrictions for
- most rail, road, sea, and air transport (IATA, DGR clause A67)
- Manufactured in Europe in our ISO 9001 certified production facilities

Real power to keep the world connected.

Exide Technologies knows how important it is to stay connected. That's why our Marathon PowerCycle batteries are the right partner for all demanding requirements for which one thing is especially important: reliability. Our high-performance AGM batteries are ideal for the following applications:

A true all-rounder knows no limits.

That's why the Marathon PowerCycle runs everywhere.

Like all Marathon AGM batteries, our new Marathon PowerCycle demonstrates exceptional performance in good grid conditions and reliable backup power in float operations. Their additional powerful features offer even more in these markets. They support challenges such as 5G deployment and ongoing network densification, which require specialized batteries in small packages and longer lifle with higher temperature resistance. With its enhanced cycle life, the Marathon PowerCycle also addresses new trends such as decentralized energy solutions and the need for more sustainability.

Long life

es and supports telecommunications and utility applications.

High performance
Guarantees absolute reliability in harsh applications.

Trend watch

New trends need smart energy storage solutions. With Marathon PowerCycle, we make our customers fit for the future.

Trend 1

5G
The rollout of 5G requires a significant enhancement of the telecom cellular networks.
Marathon PowerCycle batteries will allow mobile network operators (MNO) to achieve a substantial TCO benefit in this process.

Distributed Energy Resources
Batteries in telecom and other
stationary applications will increasingly be used to generate
revenue, providing Energy-asa-Service (Easl) in a virtual
power plant (VPP) network.
Marathon PowerCycle batteries
will allow operators to achieve
a substantial TCO benefit in
this process.

Sustainability
Sustainability will be a top priority in the next decades. Marathon PowerCycle batteries allow MNO's to minimize their eco footprint, because they require less cooling enable outdoor installations eallow for hybrid operation with on-site renewable power generation are designed for closed loop recycling

The new Marathon PowerCycle series now impresses even in uncontrolled areas with unstable or unavailable grids. With the new series, Exide Technologies is ushering in a new era: The high cycle stability and optimal behavior in partial-state-of-charge (PSoC) operation makes it an ideal storage solution for "hybrid" operation in combination with renewable energy and/or diesel generators.

High cycle stability Ensures a long life.

Ensures a long lifetime and thus low TCO when combined with renewable energy sources or used in poor- and off-grid locations.

High temperature resistance

to minimize energy costs for cooling and thus TCO.

Pioneers are already planning tomorrow's world today.

Our technology helps them to turn those plans into reality.

Success begins with the first step.

But it's more important to be convincing in the marathon.

Marathon PowerCycle technical characteristics and data

Туре	Part number	Nom. voltage	Nominal capacity	Capacity			Length	Width	Height	Weight	Internal resistance	Short circuit current	Terminal

Container material

Standard polypropylene (PP) according to UL 94 HB or flame-retardant polypropylene (PP) according to UL 94 V-0. Change »H« to »V« in the part number for UL 94 V-0 version.

Great success is often the result of effective cooperation. Our Marathon PowerCyle range convinces users in relevant application areas such as the telecommunications industry, electric utility, or UPS. Trust in us: With our wide product portfolio, we have the perfect battery solution for every project. We provide you with competent advice, project support, and installation service. Our application expertise with best-in-class online tools ensure that every customer can find the perfect battery technology for their requirements. Please get in touch with a sales representative close to you!
